Two old men meet on a bench in the park. One is a loud and imaginative Jewish man; the other is a cantankerous Black man. Their connection creates an unforgettable encounter between two people who insist on continuing to feel alive and refuse to allow society to take away their self-respect and cancel them just because of their age. A touching human comedy, smart and profound, which shows respect for age and centers around a duo that's impossible not to fall in love with. This classic duet is an ode to old age that's full of humor, a toast to the golden age and to life in general.
