## The Play

On the eve of the rabbi's daughter's engagement to the man she loves, dark secrets about the rabbi and his wife - important figures in the community – threaten to get out. The rabbanit (the mother of the bride-to-be) embarks on a courageous and emotional journey to cancel the shidduch, going against the wishes of her family, community and faith. This play exposes the gap between the new world and the world of religion and halacha, confronting us with the heart-wrenching conflict of a woman willing to risk everything for her daughter.
